## Profile

AI Enthusiast and undergraduate student pursuing a specialization in Artificial Intelligence & Data Science at the Institute of Technology, University of Moratuwa. Experienced in architecting modern, scalable web applications with an emphasis on clean design and optimal performance.

Adopts a meticulous approach to development, focusing on writing maintainable code, implementing industry best practices, and continuously expanding technical expertise. Combines analytical problem-solving with creative execution to deliver robust digital solutions.

## Education

### Bachelor of Information Technology (Undergraduate)

Institute of Technology, University of Moratuwa | Currently Enrolled

Specialization: Artificial Intelligence & Data Science

- Studying core modules in software engineering, database systems, networking, and web technologies
- Specializing in AI and Data Science — covering machine learning, data analysis, and intelligent systems
- Actively building full-stack and AI-powered projects applying both theoretical and practical skills

## Technical Skills

HTML	CSS	JavaScript	Java
Python	C	C#	C++
SQL	Machine Learning	Data Analysis	Tailwind CSS
Git / GitHub	Figma	UI/UX Design	Frontend Dev
Backend Dev	AI & Data Science		

## Roles & Competencies

## **AI & Data Science Enthusiast**

- Pursuing a specialization in Artificial Intelligence & Data Science
- Exploring machine learning algorithms, model training, and data analysis techniques
- Applying AI concepts to build intelligent, data-driven digital solutions

## **Frontend Developer**

- Designing and building responsive, accessible web interfaces using HTML, CSS, and JavaScript
- Translating wireframes and mockups into pixel-perfect, interactive web pages
- Optimising page performance and cross-browser compatibility

## **UI/UX Designer**

- Creating intuitive user flows, wireframes, and high-fidelity prototypes
- Applying user-centred design principles to improve usability and aesthetics
- Collaborating with developers to ensure faithful implementation of designs

## **Backend Developer**

- Building server-side logic and RESTful APIs using Java and Python
- Designing and querying relational databases with SQL
- Applying object-oriented programming principles in C, C#, and C++

## **Languages**

---

<b>Sinhala</b>	Native
<b>English</b>	Professional Working Proficiency
